

Legs | Hamstring

Attach the MoVeS Band to your right ankle. Stand on the band with left foot, while supporting yourself with a chair or table. Hold the remaining piece of MoVeS Band in your left hand. Lift your right lower leg backwards.

Legs | Quadriceps

Attach the MoVeS Band to your right ankle. Stand on the band with left foot, while sitting on a chair. Hold the remaining piece of MoVeS Band in your left hand. Lift your right lower leg forward.

Legs | Quadriceps

Wrap the MoVeS Band around each hand and hold firmly. Lift your leg and place your foot in the middle of the MoVeS Band, while sitting on a chair. Stretch your leg forward while keeping your hands close to your chest, thumbside facing up.

Legs | Gluteus Maximus

Attach the MoVeS Band securely around an external object near the ground. Make sure the object is firmly attached and can not move during the exercise. A door anchor is the preferred choice. Wrap the MoVeS Band around your leg. Pull your leg backwards, keeping it stretched during the entire exercise. To challenge your supporting leg, you can add a foam balance pad to the exercise.

Arms | Triceps & Biceps

Wrap your MoVeS Band around both hands. Hold your left hand to your chest, your palm facing towards your body. Hold your right hand by your waist. While holding your left hand in place, extend your right arm downward. This exercise can be performed on a gym ball, to engage your core muscles, or on a chair or standing up.

Shoulder | Deltoideus Arms | Triceps

Wrap your MoVeS Band around both hands. Hold your left hand to your chest, your palm facing towards your body. Hold your right hand by your waist. While holding your right hand in place, extend your left arm upward. This exercise can be performed on a gym ball, to engage your core muscles, or on a chair or standing up.

Shoulder | Deltoideus Arms | Triceps

Attach the MoVeS Band securely around an external object near chest height. Make sure the object is firmly attached and can not move during the exercise. A dooranchor is the preferred choice. Hold the loop at chest height, forming 90° angles with your arm across your chest. Pull sideways, keeping your forearm parallel to your torso.

Shoulder | Deltoideus Arms | Triceps

Attach the MoVeS Band securely around an external object at shoulder height. Make sure the object is firmly attached and can not move during the exercise. A dooranchor is the preferred choice. Hold the MoVeS Band firmly, your arm raised sideways to shoulder height. Bend your arm, bringing your fist to your shoulder. Extend your arm forward.

Back

Sit upstraight on an exercise mat, your legs stretched. Safely attach the MoVeS Band to your feet. Hold the two ends of the MoVeS Band in your hands, forming a 90° angle with your elbows. While keeping your hands and arms steady, lower your torso to a 45° angle. Hold for a moment and come back to the starting position.

Chest | Pectoralis

Attach the MoVeS Band securely around an external overhead object. Make sure the object is firmly attached and can not move during the exercise. A door anchor is the preferred choice. Hold the MoVeS Band firmly, your arm raised sideways to shoulder height. Pull down, keeping your arm stretched during the entire exercise.

Chest | Pectoralis

Attach the MoVeS Band securely around an external overhead object. Make sure the object is firmly attached and can not move during the exercise. A door anchor is the preferred choice. Hold the MoVeS Band firmly, your arm raised overhead. Pull down diagonally, across your chest.

Chest | Pectoralis

Attach the MoVeS Band securely around an external object at shoulder height. Make sure the object is firmly attached and can not move during the exercise. A door anchor is the preferred choice. Face away from the fixation point. Wrap your MoVeS Band around both hands, raising your arms sideways, parallel to the ground. Bring your hands together in front of your chest, keeping your arms stretched during the entire exercise. This exercise can be performed on a gym ball, to engage your core muscles, or on a chair or standing up.

Shoulders | Deltoideus Arms | Triceps

Attach the MoVeS Band securely around an external object at shoulder height. Make sure the object is firmly attached and can not move during the exercise. A dooranchor is the preferred choice. Hold the ends of the MoVeS Band firmly in both hands, your fists raised to shoulder height. Extend your arms forward.

Shoulders | Deltoideus Arms | Triceps

Attach the MoVeS Band securely around an external object near the ground. Make sure the object is firmly attached and can not move during the exercise. A dooranchor is the preferred choice. Hold the MoVeS Band firmly, your arm lowered. Start with your left hand by your right hip. Pull up diagonally, across your chest.

Shoulders | Deltoideus Arms | Triceps

Attach the MoVeS Band securely around an external object above shoulder height. Make sure the object is firmly attached and can not move during the exercise. A dooranchor is the preferred choice. Hold the MoVeS Band firmly, your arm raised forward to shoulder height. Bring your fist next to your hip, keeping your arm stretched during the entire exercise.

Shoulders

Attach the MoVeS Band securely around an external object near the ground. Make sure the object is firmly attached and can not move during the exercise. A dooranchor is the preferred choice. Kneel in front of the fixation point on an exercise mat, firmly holding the ends of the band in each hand, your arms forming a 45° angle to your torso. Bring your fists next to your hip, keeping your arm stretched during the entire exercise.

Shoulders

Attach the MoVeS Band securely around an external object near the ground. Make sure the object is firmly attached and can not move during the exercise. A dooranchor is the preferred choice. Kneel in front of the fixation point on an exercise mat, firmly holding the ends of the band in each hand, your arms forming a 45° angle to your torso. Raise your arms 90°, keeping them stretched during the entire exercise.

Shoulder | Deltoideus

Attach the MoVeS Band securely around an external object at hip height. Make sure the object is firmly attached and can not move during the exercise. A dooranchor is the preferred choice. Firmly hold the end of the band in your hand, your forearm parallel to the ground and across your stomach. Hold a rolled-up towel between your elbow and your body. Rotate your arm 90° outward.

Shoulder | Deltoideus Chest | Pectoralis

Attach the MoVeS Band securely around an external object at hip height. Make sure the object is firmly attached and can not move during the exercise. A dooranchor is the preferred choice. Firmly hold the end of the band in your hand, your forearm parallel to the ground, rotated 90° outward. Hold a rolled-up towel between your elbow and your body. Rotate your arm 90° inward.

Shoulder | Deltoideus & Subscapularis

Attach the MoVeS Band securely around an external object at shoulder height. Make sure the object is firmly attached and can not move during the exercise. A dooranchor is the preferred choice. Hold the MoVeS Band firmly, your arm raised parallel to the ground and your elbow in a 90° angle. Rotate your arm 90° upward.

Shoulder | Deltoideus

Attach the MoVeS Band securely around an external object at hip height. Make sure the object is firmly attached and can not move during the exercise. A dooranchor is the preferred choice. Face away from the fixation point. Firmly hold the end of the band in your hand, your arm straight down your side. Raise your arm forward to shoulder height, keeping it stretched during the entire exercise.

Shoulder | Latissimus Dorsi & Teres Major

Attach the MoVeS Band securely around an external object at shoulder height. Make sure the object is firmly attached and can not move during the exercise. A dooranchor is the preferred choice. Hold the MoVeS Band firmly, your arms raised parallel to the ground. Your palms facing inward, pull your elbows to your hips, forming a 90° angle with your elbows.

Shoulder | Latissimus Dorsi & Teres Major

Attach the MoVeS Band securely around an external object at shoulder height. Make sure the object is firmly attached and can not move during the exercise. A dooranchor is the preferred choice. Hold the MoVeS Band firmly, your arms raised parallel to the ground. Your palms facing upward, pull your elbows to your hips, forming a 90° angle with your elbows.

Shoulder | Infraspinatus & Teres Minor

Stand on the MoVeS Band with your front foot, while holding the ends of the MoVeS Band firmly in your hands next to your hip. Your elbows make a 90° angle. Maintain that angle while raising your arms until they are parallel to the floor.

Shoulders | Serratus Anterior & Deltoideus

Attach the MoVeS Band securely around an external object at shoulder height. Make sure the object is firmly attached and can not move during the exercise. A door anchor is the preferred choice. Face the fixation point. Wrap your MoVeS Band around both hands, raising your arms forward, parallel to the ground. Rotate both arms 90° outward, keeping your arms stretched during the entire exercise. This exercise can be performed on a gym ball, to engage your core muscles, or on a chair or standing up.

Shoulders | Serratus Anterior & Deltoideus

Attach the MoVeS Band securely around an external object at shoulder height. Make sure the object is firmly attached and can not move during the exercise. A door anchor is the preferred choice. Face the fixation point. Wrap your MoVeS Band around your hand, raising your arm forward, parallel to the ground. Rotate your arm 90° outward, keeping it stretched during the entire exercise. This exercise can be performed on a gym ball, to engage your core muscles, or on a chair or standing up.

Shoulders | Serratus Anterior & Deltoideus

Attach the MoVeS Band securely around an overhead external object. Make sure the object is firmly attached and can not move during the exercise. A door anchor is the preferred choice. Hold the MoVeS Band firmly, your arms raised overhead in front of your body. Your palms facing inward, pull your elbows to your hips, forming a 90° angle with your elbows. This exercise can be performed on a gym ball, to engage your core muscles, or on a chair or standing up.

Shoulders | Serratus Anterior & Deltoideus

Attach the MoVeS Band securely around an external object at shoulder height. Make sure the object is firmly attached and can not move during the exercise. A door anchor is the preferred choice. Hold the MoVeS Band firmly, your arms raised parallel to the floor in front of your body. Your palms facing inward, pull your elbows towards your hips, forming a 90° angle. This exercise can be performed on a gym ball, to engage your core muscles, or on a chair or standing up.
